

Bristol Stool Chart

Since it can be hard to state what is normal and what is abnormal, some health professionals use a scale to classify the type of stool passed. This helps assess how long the stool has spent in the bowel.

Type 1 has spent the longest time in the bowel and type 7 the least time. A normal stool should be a type 3 or 4, and depending on the normal bowel habits of the individual, should be passed once every one to three days.

Reference	Description
Type 1 	Separate hard lumps, like nuts (hard to pass)
Type 2 	Sausage shaped but lumpy
Type 3 	Like a sausage but with cracks on the surface
Type 4 	Like a sausage or snake, smooth and soft
Type 5 	Soft blobs with clear cut edges (passed easily)
Type 6 	Fluffy pieces with ragged edges, a mushy stool
Type 7 	Watery, no solid pieces, entirely liquid
